SUMMARY

Third-year B.Sc. Computer Science student (CGPA 8.90/10) building Python backends and AI applications with FastAPI, Django, Supabase and vector databases. Built an open-source RAG study assistant and led a four-person team to build a finance platform in a 24-hour hackathon. Looking for a Python, backend or AI/ML internship.

SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS
Backend & Frameworks: Django, FastAPI, Flask, Node.js (basic), REST APIs
AI/ML & Data: Scikit-learn, Pandas, NumPy, LangChain, LiteLLM, RAG, Qdrant (vector database), Prompt Engineering
Frontend: Tailwind CSS, Bootstrap, Alpine.js, Chart.js, React (basic)
Databases & Tools: PostgreSQL, Supabase, Git, GitHub, Docker

PROJECTS

SmallBook: AI Research & Study Assistant github.com/ShivamBhilare/SmallBook
Python, FastAPI, Supabase, LangChain, Qdrant, LiteLLM, RAG

- Built an open-source NotebookLM-style assistant that works with OpenAI, Claude, Gemini and Ollama, with configurable grounding modes and cross-notebook document sharing.
- Added a study studio that generates quizzes and flashcards from uploaded documents, grounded in the source text.
- Built asynchronous background processing for large textbooks (200+ pages) so the interface stays responsive while documents are indexed.

FinTune: Personal Finance Optimizer github.com/ShivamBhilare/FinTune
Python, Django, Supabase, Gemini API, Scikit-learn

- Built a personal finance platform with Django and Supabase, using the Gemini API to categorize expenses from voice, receipt images and manual entry.
- Built a Goal Path Simulator (Monte Carlo) and a Smart Budget Generator using Scikit-learn and ARIMA to help users optimize saving habits.
- Added gamification (quests, XP, streaks) to keep users engaged and help them finish their goals.

ExGrowth: Business Analytics App github.com/ShivamBhilare/exgrowth-analytics
Python, Django, Pandas, NumPy, RapidFuzz, Tailwind CSS, Chart.js, PostgreSQL

- Built a business intelligence app that ingests, maps and transforms raw sales spreadsheets into insights using Pandas, NumPy and RapidFuzz.
- Designed an interactive KPI dashboard with Chart.js; pre-computed analytics and cached JSON metadata in PostgreSQL for near instant load times.
- Implemented hybrid cloud and local storage with Supabase Vault, with automatic local fallback when offline.

LEADERSHIP EXPERIENCE

Vice Chairperson, ZIEGERS Tech Fest, SIES College 2026

- Led 170 volunteers and a 27-member core committee to run the Computer Science department's tech festival.
- Designed the event plan and execution strategy, and assigned resources and technical work to subteam heads.
- Made quick decisions on logistical problems during the event and weighed their downstream effects.

Team Leader (Team Nexus), ZeroDay Hackathon Dec 2025

- Led a 4-person team in a 24-hour offline hackathon to build FinTune, an automated personal finance platform.
- Drafted the application blueprint, defined execution flows and delegated technical tasks across the team.
- Managed the backend and the main GitHub branch, reviewing pull requests under strict time limits.

CERTIFICATIONS & COURSEWORK

- The Joy of Computing Using Python (NPTEL); Computer Network (NPTEL); Claude 101 (Anthropic); Introduction to AI with Python (CS50, coursework)

EDUCATION

B.Sc. in Computer Science, SIES College of Arts, Science & Commerce, Mumbai Expected March 2027
CGPA: 8.90/10 (4th semester: 9.55/10)

Maharashtra State Board, Mumbai
HSC (12th): 70.67% | SSC (10th): 78.00%
